RIPE

## Numbered Work Items Update

What is an NWI?

- Numbered work item

  - Relatively similar to a ticket

RIPE

What is an NWI?

WG participant sends an E-Mail to WG chairs

↓

WG participants develop a problem definition

↓

RIPE NCC and WG develop a solution

↓

RIPE NCC develops and deploys the change

↓

Completed

RIPE

NWI-2

- Displaying history of deleted objects

  - NCC legal team [presented](#) a legal analysis at RIPE 84

  - Any volunteers to draft this?

NWI-4

- Role of status: field in multivalued status context

  - NCC published an impact analysis of {prefix, status} tuple as inetnum primary key

  - Edward will go into detail

RIPE

NWI-10

- Adding the "country" attribute to organization objects

  - Completed

RIPE

NWI-12

- NRTMv4

  - NCC implementation is practically done

  - Can we consider this NWI finished?

RIPE

NWI-13

- ## Adding geolocation attributes

  - ## Implemented

6.2 Amendments to the "RIPE Database Terms and Conditions"

The RIPE Database Working Group reached the consensus that the provision of geolocation information should be included in the list of purposes of the RIPE Database. Accordingly, the proposed amendments to the RIPE Database Terms and Conditions include this new purpose. In addition, the pronouns "he/she" have been replaced by the gender-neutral singular "they".

The Board agreed to the proposed amendments.
