

**RIPE NCC**

RIPE NETWORK COORDINATION CENTRE

# WWW Redesign

A Brief Update

# Who? Quick introduction.

Hi, I'm Phillip Oldham (he/him)

- New Manager of the **Web Services (WS)** Team.
- Joined the NCC in July 2023.
- **25 years' experience** in the tech industry, mostly in backend and frontend development, and focusing on Agile practices and Accessibility over the last decade.

# What? The main 2023 project for WS.

The primary 2023 project for Web Services has been to re-platform and re-design the RIPE NCC's main website: [www.ripe.net](http://www.ripe.net)

# Why? Reasons for the project.

- Make the site **easier** to use:
  - Improve **readability**.
  - Improve **content discovery**.
  - Improve **accessibility** for visitors using assistive technologies.
  - Improve **responsiveness** and therefore access across devices.
  - Improve **overall experience**.
- Raise **prominence of the community** content on the site.
- **Bring branding inline** with our other sites & web apps.

# How? Overview of changes.

- Working with a **design agency** to refresh the look and feel with design best practice and **accessibility** in mind.
- **Migrating existing content** and features to a more modern platform which will be easier to modify and manage.
- Following modern website development practices to make the site **work better and more efficiently** across devices and platforms.

# How? Challenges we've overcome.

- Migrating and restructuring over **30 years' worth of content** aiming for consistency of formatting.
- Making the website feel modern and approachable while maintaining **familiarity** for regular visitors.
- Making the website **usable on smaller screen sizes** without it feeling unwieldy and confusing.

# Welcome to the RIPE NCC

As the Regional Internet Registry for Europe, Middle East and Central Asia, we serve over 20,000 members in 76 countries. We register IP addresses and ASNs, and act as the secretariat to the RIPE community.

# When? Timelines.

- The redesign project has been underway since Q4 2022.
- WS is on-track for **release in Jan 2024**.
- WS will continue to apply fixes, add features and make improvements throughout 2024.

# When? Timelines.

- We will begin to improve content organisation, structure, clarity and readability from Q2 2024.
- We will continue to provide active support on requests from NCC staff, our members and the community.

# Where? Further details.

- Further details in RIPE Labs article:

<https://www.ripe.net/s/2023-redesign-details>

- Find me at the Feedback and User Testing stand.

<https://ripe87.ripe.net> for location

- Web Services will continue to provide updates as we progress, release and update the website.
